Introduction

HEART OF IOWA Region was formed under Iowa Code Chapter 28E to create a Mental Health and Disability Service (MHDS) Region in compliance with Iowa Code 331.390. The annual service and budget plan are a component of the Management Plan which includes three parts: Annual Service and Budget Plan, Annual Report and Policies and Procedures Manual in compliance with Iowa Administrative Code 441.25.

The FY2023 Annual Service and Budget Plan covers the period of July 1, 2022 to June 30, 2023. The Annual Service and Budget Plan includes local access points, targeted case management providers, crisis services, intensive mental health services, a description of the scope of services to be provided including core services, budget and financial provisions, and provider reimbursement provisions.

Heart of Iowa Community Services (HICS) utilizes a Regional Governing Board made up of a Board of Supervisor member from each of the three counties that make up the region. With the addition of the children's system to the regions, three new voting members were added to the Governing Board. Those members include an adult relative of a member who utilizes MHDS services, an individual representing the education system, and a parent of a child who utilizes children's behavioral health services. Two other members are a provider of MHDS services and a Children's Behavioral Health Service provider. The HICS Region holds Advisory meetings on a quarterly basis.

E. Scope of Services & Budget and Financing Provisions

The table below identifies the scope of services offered by Heart of Iowa. All core services are available. If there is not funding identified in a core service column, it is because it has not been needed historically. If an individual needs funding for a core service and meets eligibility requirements in section F, page 18, of Heart of Iowa's Management Plan, funding will be made available. Core services for children's behavioral health are identified by (**) after the service name. Eligibility guidelines for children's behavioral health services are located in section F, page 18 of Heart of Iowa's Management Plan. The Heart of Iowa Management plan be found online at: hicsiowa.org

The region will utilize braided funding that includes regional, state, and other funding sources to meet the service needs within the region. Federal funding, third-party payors, and other nongovernmental funding is to be used prior to expending state regional service payment dollars.

G. Financial Forecasting Measures

The following is a description of the financial forecasting measures used by Heart of Iowa Region in the identification of service need and funding necessary for services.

The following is a description of the financial forecasting measures used by Heart of Iowa Community Services Region in the identification of service need and funding necessary for services.

Heart of Iowa Community Services (HICS) Region is home to Dallas County which has posed its own challenges since it is the fastest growing county in the state. From history and census data, we know that the population of our region grows by 3,000-4,000 per year. We serve approximately 400-500 new individuals in mental health and disability services each year. HICS is committed to developing a service system that serves individuals in a multi-occurring trauma informed way that wraps services around our citizens in need, in order to assist in recovery.

HICS is extremely thankful for the new funding mechanism put in place in FY21. While we were able to develop new services prior to that, we were not able to adequately develop a fully functioning system to meet our citizens at every level of crisis.

With the new system of funding, HICS has begun to develop new services and fully realize services already in place. In 2022, HICS was able to begin a partnership with law enforcement in our region to develop a co-responder model imbeds a clinician with a mental health officer to respond to mental health calls. In just the first four months of the pilot project alone with Waukee PD the team has had the following outcomes:

- More than 125 calls for service and follow-up have been responded to.
- Over 25 jail diversions have taken place.
- More than a dozen diversions from local emergency departments have occurred.
- Nearly 50 referrals have been made to local community resources.

As a result of this effort, the law enforcement agencies involved have agreed to having 100% of their departments CIT (Crisis Intervention Training) trained. CIT is the initial step in mental health jail diversion processes. CIT trains first responders how to best identify, de-escalate, and navigate a mental health crisis. De-escalation is the practice of using verbal and nonverbal skills to allow all parties (first responders, mental health professionals and those in need) time to slow down, think through their options and make better decisions that put mental health and safety at the forefront of the situation. In successful mental health jail programs, people in need are less likely to be sent to jail because they are evaluated and connected to services that assist them in moving forward with life.

HICS is now tracking pre-booking jail diversion. We are seeing many good outcomes and will be working with the ICTS team at ISAC to develop tracking in CSN. Because we have the ability to interact with individuals in the onset of psychosis along with greater options for treatment, we are better able to assist individuals toward recovery and divert them from the justice system

As of March 2023, over 260 law enforcement officers in the HICS Region have been trained in CIT. It is anticipated that by October 2023 all current officers in the region will have received the training. SolutionPoint+ has been contracted for the training portion of the project. HICS has utilized SolutionPoint+ since 2020 for Crisis De-escalation training, Law Enforcement Wellness and Resiliency, and CIT training. We are looking forward to a continued partnership.

As stated previously, it is the intent of HICS to develop a fully functioning system within our Region to meet the needs of Adult, children, and families in the mental health and disability system. We feel HICS is in need of a children's crisis stabilization/access center and are in the process of partnering with Zion Behavioral Health to develop a facility to meet the needs of children in the state of Iowa. HICS is aware as we develop quicker ways of getting to children and families in need of assistance, we also need to develop consistent ways of meeting their needs. It is our hope that the facility will be operational by October 2023.

HICS is partnering Ellie Mental Health, a new mental health agency in the West Des Moines area to assist with first responder mental health. This is part of a new first responder peer support initiative HICS has adopted in our new contract with Solution Point Plus. We want to ensure proper, confidential care for those whose occupation it is to care for others.

In order to continue to pursue a holistic and fully functioning system within the Heart of Iowa Region, HICS is committed to pushing providers within the region to pursue grants and other streams of funding so as not to rely solely on Regional funding as a backup. In doing so, HICS can continue to develop new services to enhance the Regional system.

HICS has been developing services which means our fund balance is well below the requirement of SF619 which changed the way MHDS Regions are funded. Regions went from a system based on county property taxes to a 100% State-funded system. For FY 2023, Regional fund balances are limited to 40.0% of the preceding fiscal year's actual expenditures (FY2022 fund balance certified on 12/1/2022). The dollar amount over 40% will be withheld from the remaining supplement payments to the region (January & April 2023). If the amount over 40% is more than the remaining supplement payment to the region, the region must pay the difference to the Department. For FY 2024, fund balances are limited to 20.0% (FY2023 fund balance certified on 12/1/2023). For FY 2025 and beyond, fund balances are limited to 5.0%.

What this means to HICS is the need to prioritize new services the region will develop. That is why we have begun to push hard for grant funding. We see the need for the fully realized system for our citizens and want to see the collaboration with law enforcement, crisis system, jail, and service providers continue.

H. Provider Reimbursement Provisions

The following is a description of the types of funding used by Heart of Iowa Community Services Region.

- **Fee for service:** Heart of Iowa contracts with MHDS providers whose base of operation is within the region. Heart of Iowa may also honor contracts that other regions have with their local providers or may choose to contract with providers outside of the region. A contract may not be required with providers that provide one-time or as needed services. A fee for service approach will be utilized in most provider contracts outlining the services to be provided and the rate of reimbursement. All payments will be based on a pre-authorized request for service authorization with the exception of court ordered payments, such as civil commitment costs and crisis services.
- **Block grant payments:** This payment type is used when no other funding stream is available and startup costs are needed.
- **Compensation for a “system of care” approach:** System of Care funding is utilized when Medicaid is not available and multiple services are a part of the services being utilized.
- **Use of nontraditional providers:** When a non-traditional provider arrangement is more appropriate than a fee for service approach with a contracted provider, the Coordinators of Disability Services will work with the region’s CEO to request such arrangements. A non-traditional provider may be an individual, organization and/or business who delivers services in the consumer’s home and/or other community setting. Non-traditional providers typically are individuals, organizations, or businesses which do not provide MHDS services as a part of their normal business. These services are not to provide treatment but are supportive and may be rehabilitative in focus, and are initiated when there is a reasonable likelihood that such services will benefit the consumer’s functioning, assist them in maintaining community tenure, and act as an alternative way to achieve the consumer’s stated goals or outcomes. A request for funding can be made by any consumer, or the consumer’s authorized representative, to utilize non-traditional providers for services as approved in the Regional Management Plan. Non-traditional providers may be subject to certain licensing, certification, accreditation or other state approval standards.
- **Incorporation of all funding sources for individuals including Medicaid:** Heart of Iowa is responsible for ensuring that MHDS services are available to all residents of the region regardless of funding source. HICS will ensure that individuals apply for all funding sources prior to accessing regional funding, including private insurance, Medicaid, Medicare and other funding mechanisms which ensure that individuals and their families are able to optimally live, work, and recreate in integrated communities of their choice.
- Heart of Iowa Region may allow for a family unit to exceed the \$2000/\$3000 limit in admin rule for FY23 (331.393)(2.h.) when a child is in need of BHIS services and the child is not eligible for Medicaid and the family shows they are not able to fund the sliding fee scale.
